

HOW DO I GET COVERAGE FOR MY PETROLEUM STORAGE TANKS?

◆ FIRST –

- Ask yourself
- Are the tanks in use? and
 - Do the tanks contain petroleum products? and
 - If they are ASTs, is the product in the tanks offered for sale?

If the answer to all three questions is yes, you may apply for participation in the PSTIF.

◆ THE CRITERIA FOR PARTICIPATING ARE:

- You **must** be in compliance with all pertinent requirements of Missouri State and Federal regulations;
- You **must** demonstrate the ability to pay the \$10,000 deductible if you ever have a claim;
- You **must** fill out and sign the application form and supply all requested documents; and
- You **must** pay the required annual participation fee and the one-time \$100 administrative fee for each tank.

If you currently meet the four criteria listed above and you wish to apply for participation in the PSTIF,

◆ THEN, **EITHER** –

A) FILL OUT THE APPLICATION AND SEND -

- Evidence of how you plan to pay the \$10,000 deductible, if you ever have a claim;
- One or more photographs of the facility, showing as much of the tank system and containment as possible (this varies by the type of tank system);
- A scaled diagram of the site showing the location of tanks, piping, buildings, dispensers, etc.;
- A calculation sheet showing the size of the secondary containment (if applicable);
- Leak detection records as described under Question 11 of application; and
- Your check.
